

Weight-one Pauli fault P

Decoded frame:
 $E^\dagger P E = \pm L \otimes Q$

$Q \in \{I, Z\}^{\otimes(n-1)}$?

no

Rejected ($\sigma \neq 0$):
 $p_{\text{acc}} = 0, \Delta(E, P) = 0$

yes

$L \neq I$?

no

Accepted and harmless:
 $P \in \mathcal{S}_E, \Delta(E, P) = 0$

yes

Accepted and harmful:
 $P \in N(\mathcal{S}_E) \setminus \mathcal{S}_E, \Delta(E, P) = 1$
