

The nonlinear term needs the field itself

```
graph TD; A[The nonlinear term needs the field itself] --> B[Linearize in a larger space]; A --> C[Consume copies of the state]; A --> D[Measure, update, reload (this chapter)]; B --> E[Cost hidden in truncation]; C --> F[Cost hidden in copy count]; D --> G[Every shot and gate counted];
```

Linearize in a larger space

Cost hidden in truncation

Consume copies of the state

Cost hidden in copy count

Measure, update,
reload (this chapter)

Every shot and gate counted
